

# DAIMLER TRUCK

## How to register a security key to sign in to a Business ID application Guide

# Introduction

This guide provides information on how to register a security key to sign in to your application via Business ID.

# Step 1: Navigate to the Daimler Truck Business ID login page

Log in to your application to be directed to the login page of the Daimler Truck Business ID portal.

If you do not have a Daimler Truck account (...@tbdir.net), please:

1. Enter your Email or User ID in the field "Email or User ID".
2. Click "Continue".

## Step 2: Click "Passwordless Login"

Click "Passwordless Login".

The screenshot shows a login interface for 'BUSINESS ID'. On the left, under 'BUSINESS ID', it says 'First-time login? Start with password reset [here](#).' At the bottom left are links for 'Forgot your password?' and 'Help Center'. On the right, under 'Login', it says 'Hello,' and 'Please enter your Password to sign in to your account.' Below this is a 'Password' input field, followed by a black button with a question mark icon and the text 'Continue'. Below that is another black button with a question mark icon and the text 'Passwordless Login', which is being pointed to by a hand cursor. At the bottom right is a yellow button with a question mark icon and the text 'Login with Daimler Truck Account'.

## Step 3: Enter your user ID or email

Enter your User ID or email address and click "Continue".

**BUSINESS ID**

**Initiate FIDO2 Login**

Please enter your user ID / email to register for FIDO2 (passwordless) authentication.

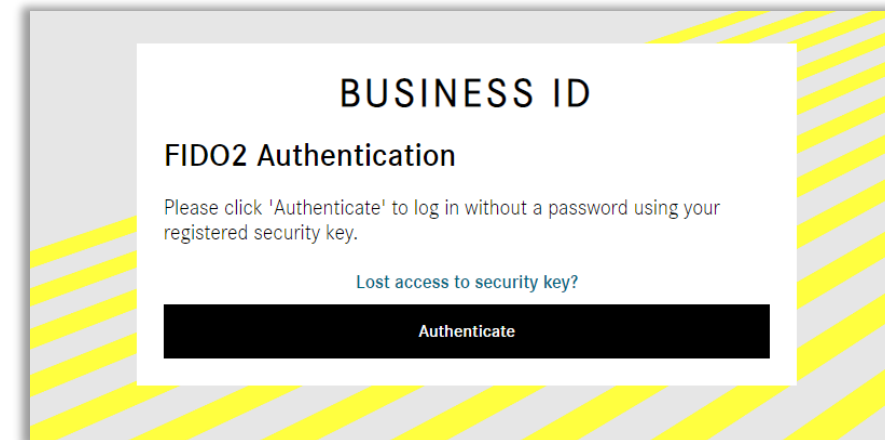

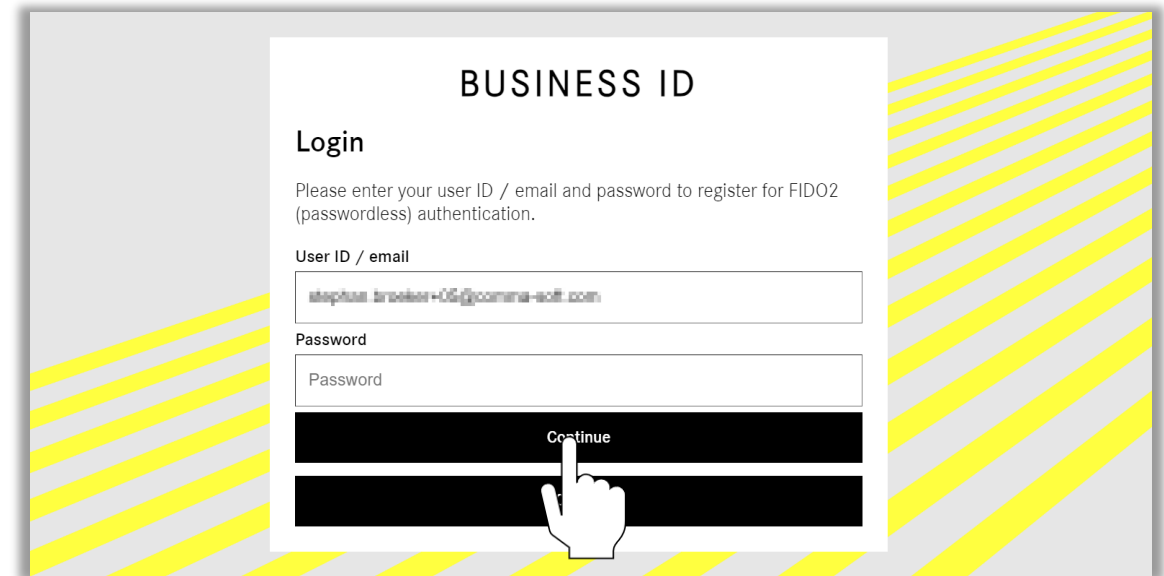

User ID / email

Continue

## Step 4: Enter your password

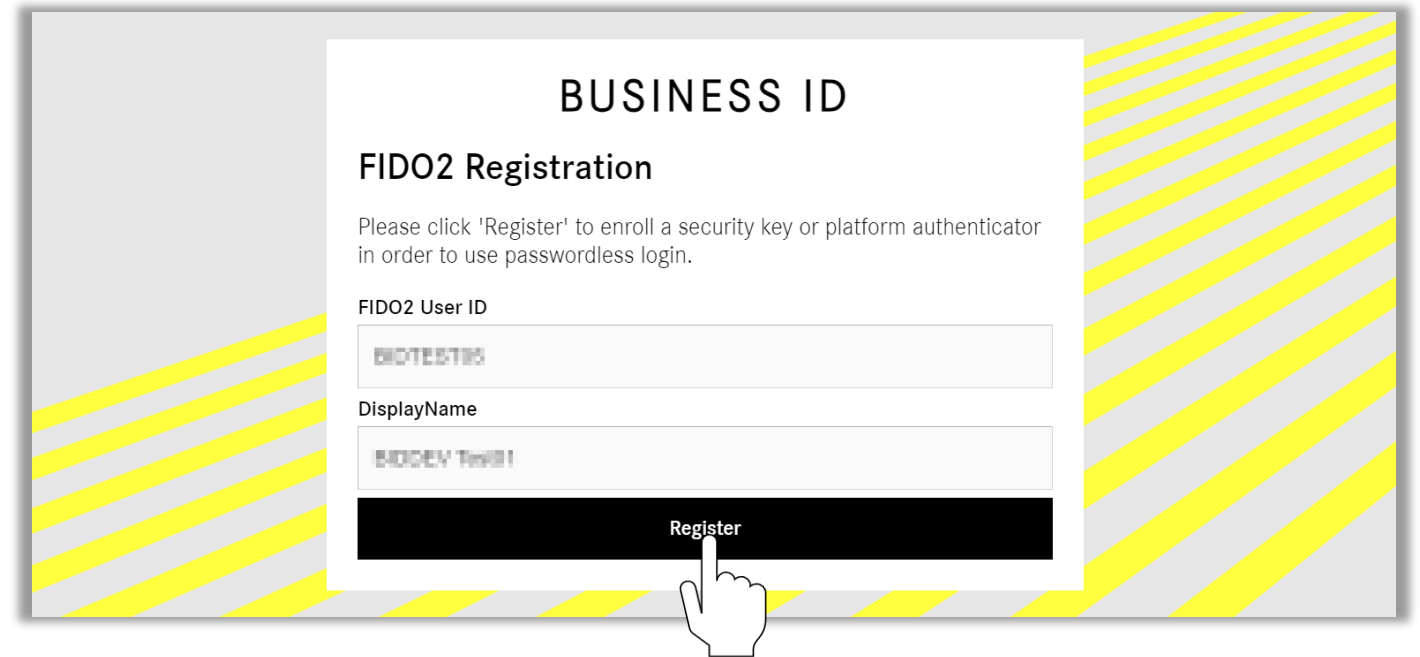

Enter your password and click "Continue".

Please note: If you have already registered a security key, a different dialogue appears (see bottom screenshot). To register a new security key or reset your security key, click "Lost access to security key?" in that dialogue and follow the instructions.

## Step 5: Check your FIDO2 User ID and the DisplayName

Your "FIDO2 User ID" and your "DisplayName" are generated by the system and displayed here. You might want to write this down because you will need this again in the future. Then, click "Register".

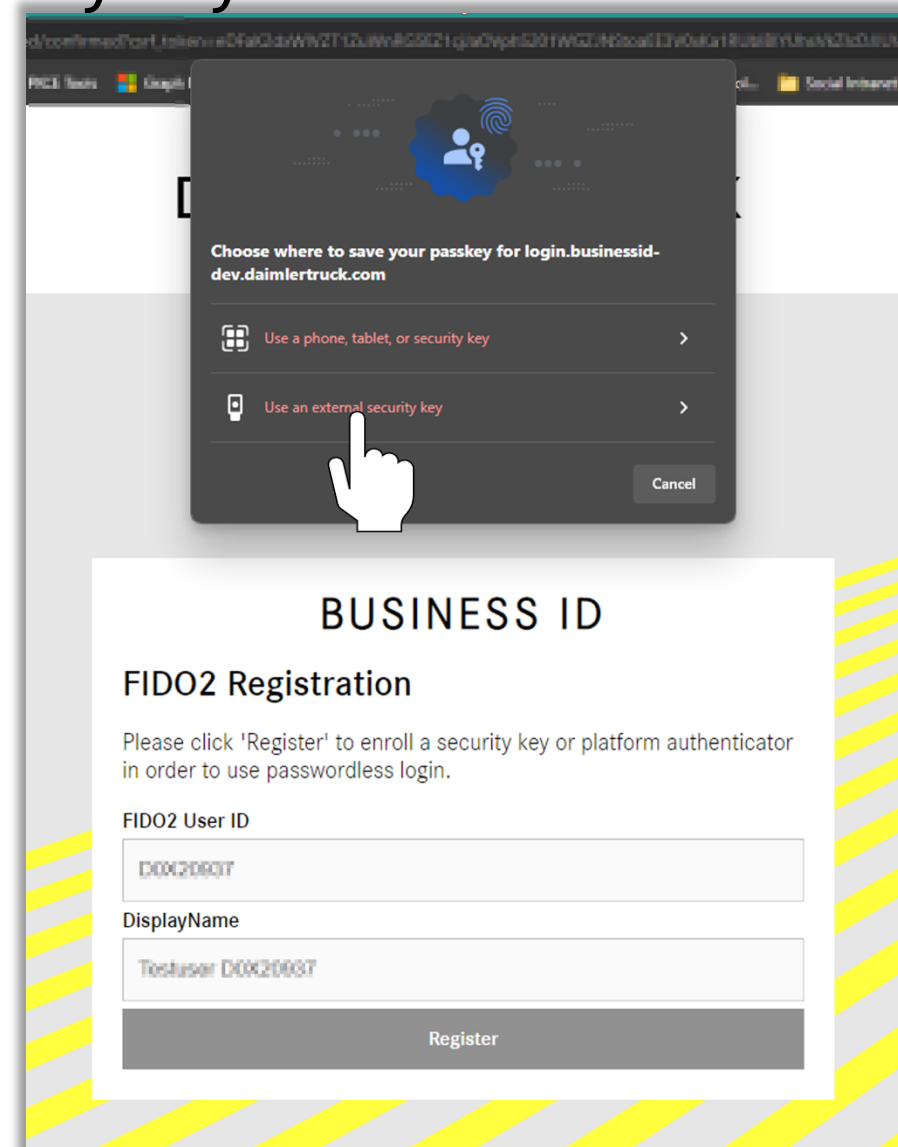

The screenshot shows a web interface titled "BUSINESS ID" with a subtitle "FIDO2 Registration". Below the subtitle, there is a message: "Please click 'Register' to enroll a security key or platform authenticator in order to use passwordless login." The interface contains two input fields: "FIDO2 User ID" with the value "B07E5T85" and "DisplayName" with the value "B00EN TWA81". At the bottom, there is a black button labeled "Register" which is being clicked by a hand icon. The background of the interface features a yellow and grey diagonal striped pattern.

## Step 6: Select the option external security key

A pop-up window opens and asks you where the passkey should be saved.

Choose "external security key".

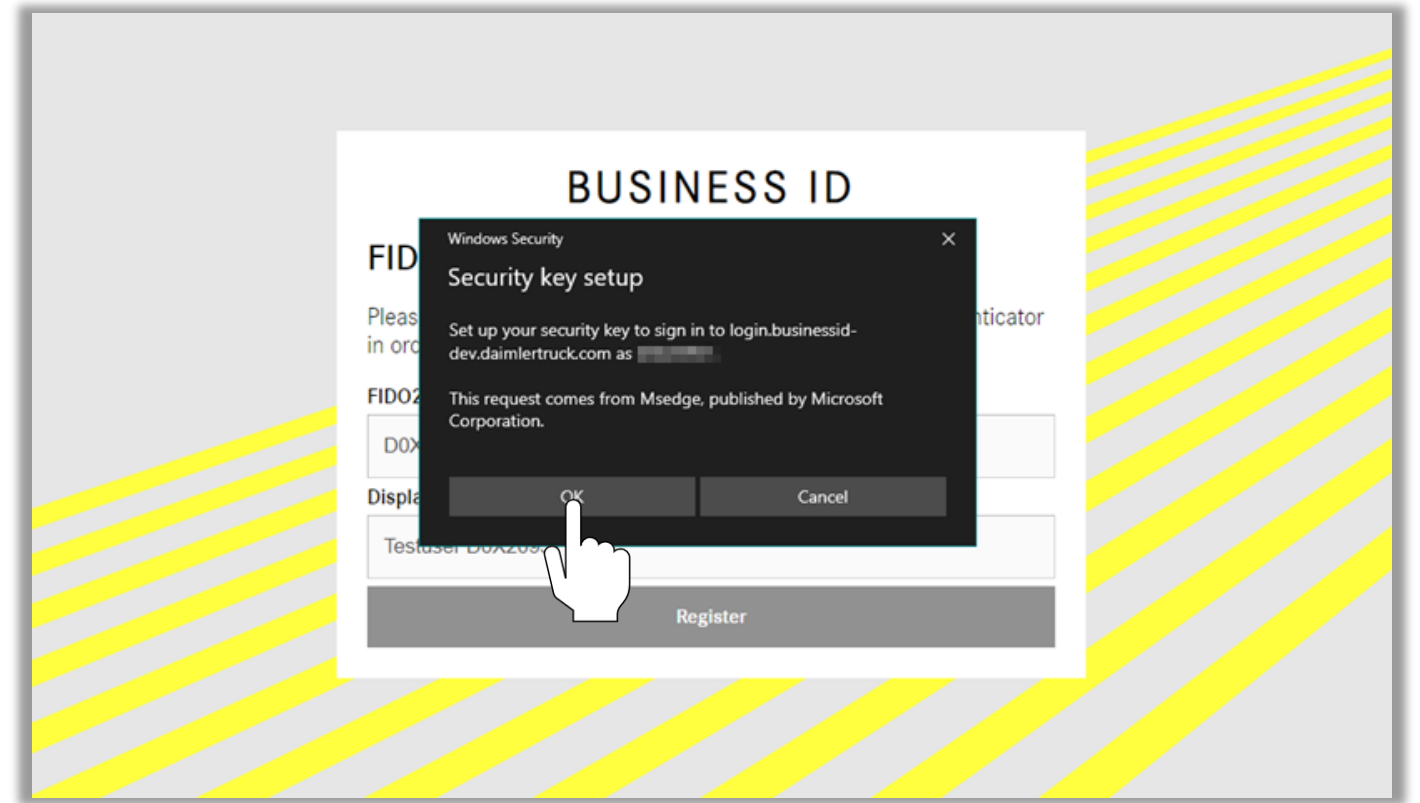

Please note: The format of this pop-up and the following window may vary depending on your browser, device and operating system.

## Step 7: Confirm security key setup

Click "OK" to confirm the security key setup.

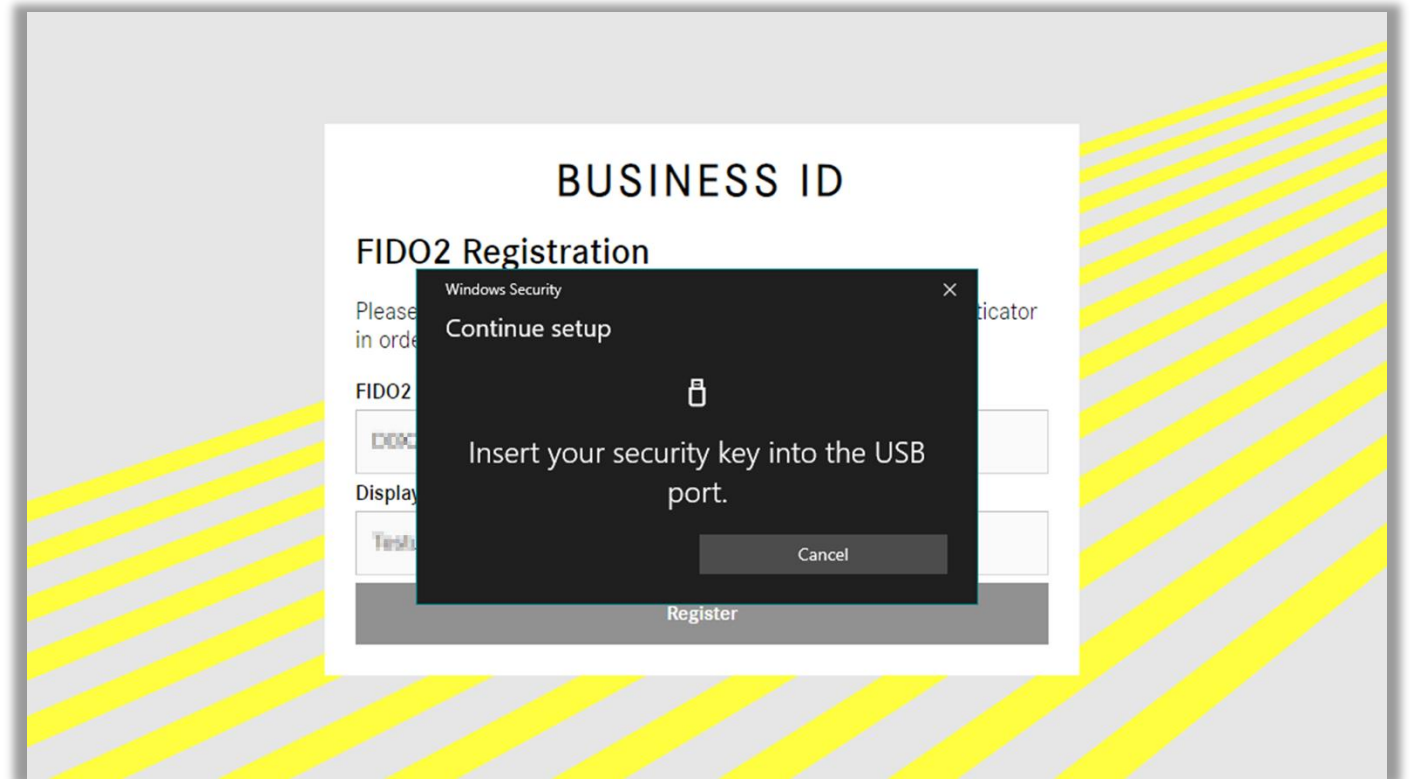

## Step 8: Continue setup

Click "OK" to create the credential on your security key.

## Step 9: Insert your security key

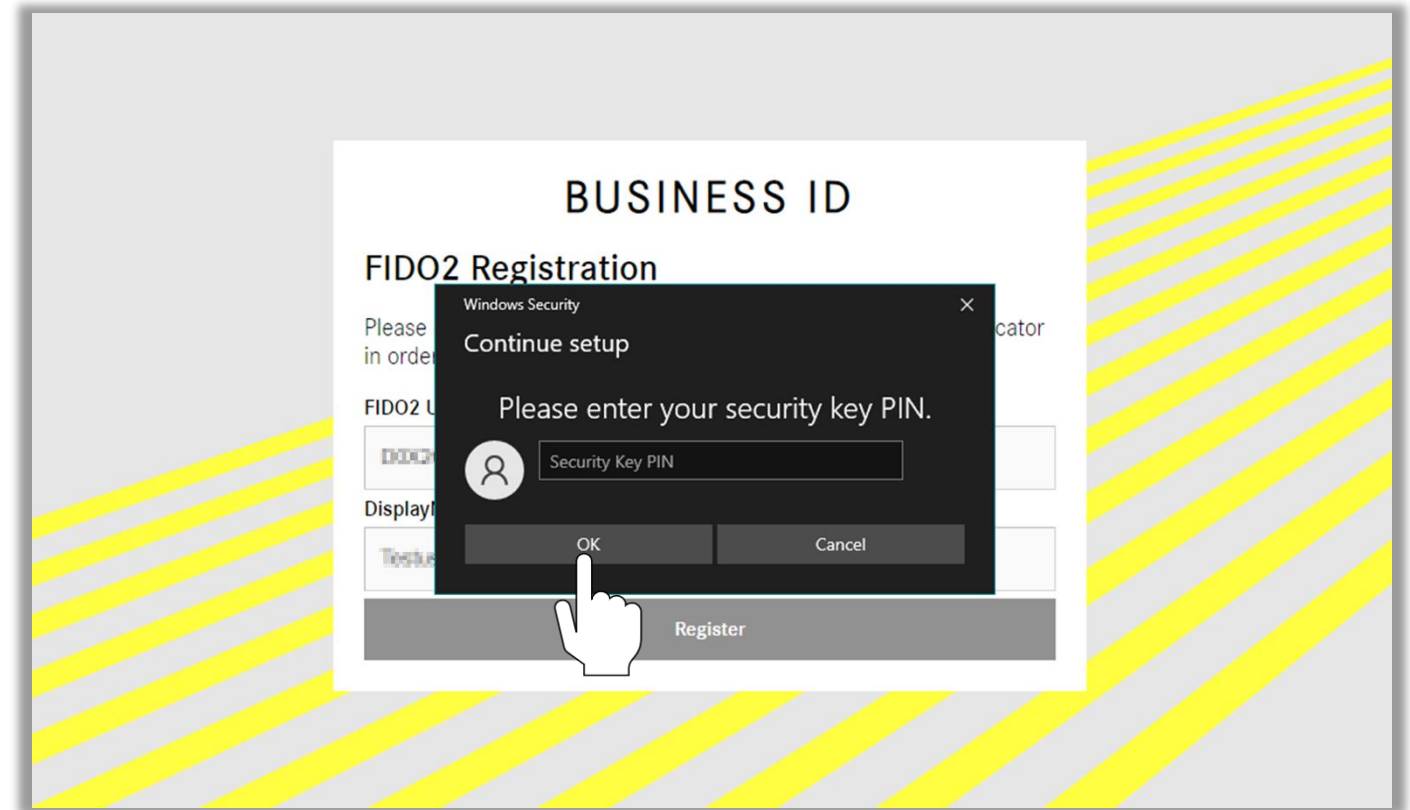

Insert your security key into the USB-Port of your device when prompted by a pop-up window. If you already inserted it before, this dialogue will be skipped.

# Step 10: Enter your security key PIN

Enter your security key PIN and click "OK".

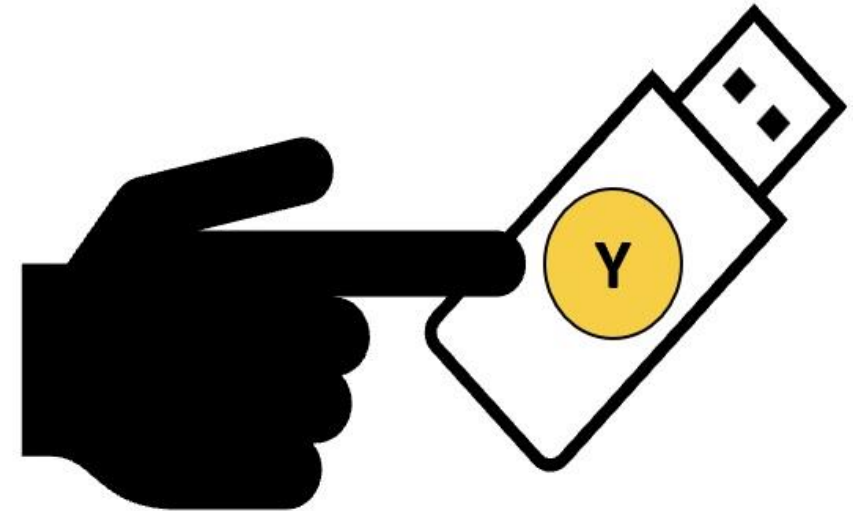

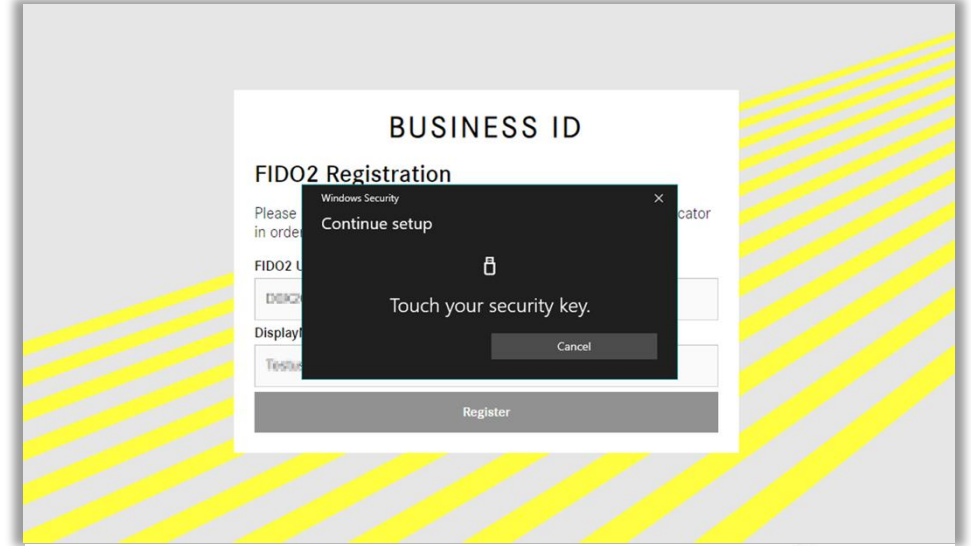

If you set up a new security key, you will be prompted to set a PIN for this security key. Please set the PIN and follow the instructions.

# Step 1 1: Touch your security key

Touch the button on your security key.

You will then be forwarded to your application.

# Congratulations!

**Congratulations!** You have successfully registered your security key for your application in Business ID.
